Data Analyst with experience in product analytics, KPI validation, cohort segmentation, and stakeholder-facing reporting across SQL Server, Python, Excel, Power BI, and Tableau. Strong focus on analyzing product usage and customer behavior patterns, documenting reusable SQL/reporting logic, and translating trends into dashboards and recommendations for product and business teams.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, SQL Server, MySQL | **Analytics Tools & Microsoft Office:** Power BI, Tableau, Power Query, Microsoft Excel, PowerPoint, Alteryx (foundational), Sharepoint | **Product & Reporting Analytics:** Product Analytics, Product Usage Analysis, Cohort Analysis, Customer Segmentation, KPI Validation, Report Generation, Statistical Analysis, A/B Testing Concepts | **Agile & Scrum Tools:** Jira, Confluence, Git, Notion

PERSONAL PROJECTS

Credit Card Portfolio Analytics

Apr 2026

- Modeled an Excel-based financial services portfolio reporting file to track balance exposure, delinquency rate, at-risk exposure, and recovery rate across 2 years of customer-month records, creating KPI scorecard views across 4 portfolio risk tiers.
- Optimized a fixed \$50K recovery budget using variance analysis and Excel Solver, applying problem solving to improve projected recovery dollars by 46% and support finance decision-making.

Customer Churn & Segmentation Analysis

Dec 2025 - Jan 2026

- Engineered Python-based behavioral features from 1M public e-commerce retail transactions, applying statistical analysis to customer purchase patterns and structured datasets for churn and segmentation modeling.
- Translated churn scores into customer segments and retention recommendations across 4 risk profiles, supporting data-driven decision-making through audience profiling and product/customer behavior analysis.

Sales Data Warehouse and Analytics Dashboard

Aug 2025 - Oct 2025

- Constructed a SQL Server reporting database from raw data, using ETL-style stored procedures to load, transform, and validate 28K orders and 18K customers into a star-schema model.
- Validated duplicates, nulls, row counts, referential integrity, and revenue calculations, delivering a DirectQuery Power BI dashboard for strategic initiative, tracking \$29M sales data.

PROFESSIONAL EXPERIENCE

Data Analyst (Co-op) - Yonge Street Mission (YSM), Toronto, ON

Jan 2025 -Apr 2025

- Coordinated a 5-member analytics team across task assignment, validation review, stakeholder communication, and dashboard feedback, aligning Power BI outputs with program measurement needs and reporting priorities.
- Built analysis-ready datasets from 5,000+ participant records spanning 5 years using Python, SQL, and Excel, applying data quality checks to support cohort, demographic, and program-effectiveness reporting.
- Analyzed TIMES outcome scores against 18 wellbeing indicators and program-participation patterns to identify key factors associated with participant success and service effectiveness.
- Segmented participants into three engagement profiles through cluster analysis and delivered findings through stakeholder-ready reports and a Power BI reporting solution for ongoing outcome monitoring.

Data Analyst - Product Analytics - Websphere Technolabs, Gujarat, India

Jun 2022 - Jul 2023

- Applied product analytics to dealership loyalty data, analyzing 7 loyalty KPIs across points activity, transaction frequency, redemption rate, and customer segments to identify product usage and behavior patterns.
- Executed cohort analysis, customer segmentation, and post-campaign analysis to compare customer behavior trends, measure baseline performance, and identify improvement opportunities for redemption strategy.
- Investigated KPI logic and reporting discrepancies through SQL-based analysis, documenting reusable query logic while tracking Jira fixes, dashboard enhancements, testing follow-ups, and process documentation with developers.
- Presented analysis summaries and used critical thinking skills to explain findings that informed redemption strategy changes, driving a 20% improvement in redemption rate and stronger transaction frequency.

EDUCATION

Northeastern University | Toronto, Canada

Sep 2023 - May 2025

Master of Professional Studies in Analytics (Applied Machine Intelligence)

PP Savani University | Gujarat, India

Aug 2018 - Jun 2022

Bachelor of Technology in Computer Science

CERTIFICATES

Microsoft Azure Data Fundamentals - Microsoft

Dec 2025

Microsoft Power BI Data Analyst - Microsoft / Coursera

Sep 2024
